RAIN PLAY MADE EASY

PGA great and Ryder Cup captain trusts ZR. "From my years on Tour and my experiences as both a Ryder Cup player and captain, I can tell you first hand that Zero Restriction makes the highest quality and most functional outerwear in the industry."

Tom Lehman
2006 Ryder Cup - US Team Captain

THE RIGHT RAIN GEAR ALLOWS COMPLETE FREEDOM OF MOVEMENT

Traditional rain jackets are too tight or too bulky. Either your sleeves "ride up" your arms or the extra bulk in the jacket's front interferes with your swing. Most Raingear designed for golf offer a set of solutions to these traditional problems. ZR, for example, has developed a series of patented features that deliver freedom of movement:

Dual Motion® Cuffs - "Telescope" to prevent jacket ride up. As an feature, once the cuff position is "set", the sleeve stays in place - and will never interfere with your grip.

Expansion Back Pleats™ - 4 two inch pleats across the garment back creates 8 full inches of expansion and delivers complete freedom of movement.

LADY ZR ADJUSTABLE FIT - ONE JACKET THREE LOOKS:

Choose from the relaxed "just put it on" look, an adjusted "show your shape" look or the "short waist" look.

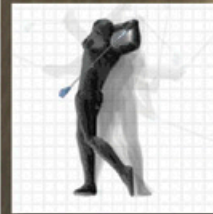

Rain Gloves guarantees a sure grip

Bucket Hat & High Collar guarantees full watershed

ZR Jacket guarantees no restriction

Slacks superior wet weather protection

RAIN GEAR + BUCKET HAT + RAIN GLOVES

= THE RAINPLAY SYSTEM

While a waterproof suit that provides freedom of movement is the foundation, the proper hat and gloves are critical to pulling your rainplay system together.

The Rainplay System is your competitive playing advantage when the conditions are tough. The ZR "Wetter the Better" raingloves offer firm grip in the hardest of rain. The ZR GORE-TEX bucket hat's wide brim directs water away from your body, keeping you dry and comfortable.

BRING YOUR GAME.
LEAVE YOUR UMBRELLA.
